## SUMMARY

Dear Hiring Manager,

As a final-year student at Jaypee Institute of Information Technology (JIIT) Noida, specializing in Electronics and Communication Engineering (ECE), I am eager to transition into a role where I can leverage my skills in software development and data analytics. My academic background is complemented by practical experience, having worked extensively with C++, Python, SQL, data structures and algorithms (DSA), and intermediate machine learning.

During my internship as a Web Development Intern at Next24Tect Technologies, I focused on front-end development, where I created and optimized various websites. This experience allowed me to develop a strong foundation in designing intuitive user interfaces and implementing effective web solutions. Additionally, my summer internship at Ahuja Radios provided me with a broader perspective on technology and its applications.

I am enthusiastic about the opportunity to contribute to a dynamic team, where I can apply my skills in software development and data analytics. With a solid foundation in front-end development from my internship at Next24Tect Technologies and practical experience in programming languages such as C++ and Python, I am eager to tackle challenges and drive innovation. My hands-on experience with web development, coupled with my knowledge in data structures, algorithms, and machine learning, equips me to make meaningful contributions. I look forward to discussing how my unique blend of technical expertise and enthusiasm for learning can be an asset to your team.

Sincerely,

Aishwarya Pandey

Software Developer
